I got my COVID-19 VACCINE... now what?

1. Sign up for V-Safe
   V-Safe is a smartphone-based tool from the CDC where you can report any side effects and receive reminders about your second dose.

2. Keep your CDC COVID-19 Vaccination Record Card safe
   After your first dose and second dose, make a copy of your COVID-19 Vaccination Record Card. You should not laminate your Vaccination Record Card until after your second dose.

   TIP: To protect your personal information, do not post pictures of your Vaccination Record Card.

3. Continue to Mask Up
   When in public or around unvaccinated adults, keep wearing a mask, social distancing, and practicing good personal hygiene.
